

REMARKS

Applicants have elected claims drawn to a method of eliciting an immune response. A protein which is at least a portion of a 158P1D7 related protein that comprises at least one T cell epitope or B cell epitope is used to contact an immune system or appropriate cells thereof. Claim 19 has been amended to clarify this; claim 21 has been amended for clarity, and claim 67 has been amended so that appropriate antecedent basis is found in claim 19. No new matter has been added and entry of the amendment is respectfully requested.

In the unlikely event that the transmittal letter is separated from this document and the Patent Office determines that an extension and/or other relief is required, Applicant petitions for any required relief including extensions of time and authorizes the Assistant Commissioner to charge the cost of such petitions and/or other fees due in connection with the filing of this document to **Deposit Account No. 03-1952** referencing docket No. 511582005000.

Respectfully submitted,

Dated: August 6, 2003
